TECHNICAL DATAS

PET high temperature tape（AA）

Features：

PET tape is with polyester film as the basic carrier, and coated with pressure sensitive silicone adhesive. It features like high temperature resistance (200℃), electrical insulation, radiation resistance, solvent resistance etc. This tape is very easy to stick and remove without residue, and very suitable for high temperature stoving varnish and powder coating masking etc.

Appliances：

- Powder coating masking and high temperature stoving varnish.
- The protection of PCB board

ITEMS	DATAS
Backing	0.05mm polyester film
Adhesive	Silicone
Color	Green, blue, yellow, transparent
Thickness (mm)	0.08
Length	33M of 66M
Tensile Strength (N/25mm)	≥120
Elongation (%)	≥70
Breakdown strength	≥150
Voltage resistance (KV)	5
Adhesion (N/25mm)	8
Temperature Resistance (℃)	200℃
